male, increase in weight with age 236
mean weight deviation in 252
weights at selected ages 245
Biotin deficiency
effect on food intake 175
effect on body and organ weights 175
Biotin-deficient diet 179
Birth weight
distribution of male Indian infants 156
of children 338
correlation coefficients for 339
of six American Indian tribes 153
method of analysis 154
probability-ratios for 155, 157
Body and organ weight in undernourished rats 143
Body weight in the rat 221, 222
following starvation 285, 290
in control rats 292
Bone growth, effect of tetracycline on 113
Bone weight, fetal 83
Book Reviews 168, 169, 170, 357, 358
Cancer of the lung 41, 55
Carcinoids and serotonin (Book Review) 358
Chick tibia,
growth in organ culture 267
effect of somatotropic hormone on 271
Cigarette smoking, effect on lung cancer 45
Circadian rhythm in the rat 140
Comparison of methods of estimating growth 323
Cost factor for beagles 248, 250
Cumulative effects of malnutrition after weaning 147, 148
Dentition in Japanese children 231
effect of prenatal factors on 331
Diaphragm weight in the rat 324
Dicathais, overall growth curve for 324
Differences in weight gain between control and irradiated mice 301, 302
Distribution of labeled thymidine and proline in bones 118
Environmental adaptation 1
Enzymes of megakaryocytes 194
Embryo weight and length of incubation 189
Embryo weight of the duck 225
Embryonic growth, duck 225
Epidemiological study of lung cancer 41
Epidermoid lung cancer in females 55
as related to cigarette smoking 55
Erratum 359
Eruption and development of teeth 334
analysis of covariants for 334
Ethanol, effect on incidence of hepatoma 311
Excess amino acids in diets 262
Fetal bone weight 83
Fetal weights according to race and sex 87
correlation coefficients of 88
equations for estimation of 88
Fitting of the Gompertz curve to growth of beagles 239, 240
Gompertz function as applied to beagle growth 241
Gompertz growth curves 351
Graphical method of estimating growth of *Dicathais* 324

for undernourished rats 145
Gompertz 351
of bone 133
of cartilaginous tibial bud 272
of chick tibia in culture 267
of insect larvae 71
of rats 75, 250, 258
data, analysis of 319
embryonic, of ducks 225
inhibition by tetracycline 117
rate factor in developing rats 81
rate of organisms related to time 348
Growth and age in the prairie vole 57
Growth and time 347
Growth-stimulating proteins 23
Hemoglobin concentration and environmental changes 21
Hepatoma in C3H mice 311
Hereditary Factors in Carcinoma (Book Review) 357
Horizontal measurements of shape changes in human trunk 208
Hydrolytic enzymes in rat megakaryocytes 189
Hypertrophy of mouse kidney 199
Hypophyseal somatotropic hormone 267
effect on organ culture 267
Human birth weight 158
Incidence of variables in female lung cancer 51
Insect larval growth 71
Lateral silhouette of human trunk 205
Limbs and beak, embryonic growth in ducks 230, 231
Linear growth of tibial bud in culture 278
Low birth weight in American Indians 151
Lung cancer
effect of environmental and hereditary factors on 46
histological classification of 52
in females 41
mortality rates 42
prevalence in lifetime smokers 48
Malformin, measurements of 127
Malformin production in metal-enriched synthetic medium 129
Mathematical analysis of organ weights in rats 4
Mean body weight gain of irradiated mice 305, 306
Mean body weight of mice of different lines 300-303
Mean daily food consumption. 79
Mean embryonic growth rates of ducks 226
Median age for different stages of tooth formation 335, 336
Megakaryocytes
in fetal liver and spleen 193
in rat spleen and liver 189
morphological classification of 19
Metallic salts, effect on malformin formation 128
Mice, inbred 298
